DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-10 and 12-18, drawn to a flat panel display, classified in class 257, subclass 59.
- II. Claims 11 and 19, drawn to a method of manufacturing a flat panel display, classified in class 438, subclass 30.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the flat panel display as claimed can be made by another materially different process such as depositing the polycrystalline silicon portions, as opposed to recrystallizing a portion of the amorphous silicon layer to form polycrystalline silicon regions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
